Useful software. Built around you.

Websites, custom apps and practical AI for businesses and people. A public overview of our capabilities and 12 projects.

INSIDE THIS GUIDE

02 What we can build for you

03-05 Twelve projects, explained simply

06 From your first idea to a supported launch

emberweb.co.za

WHAT WE BUILD

Start with something useful.

Choose a problem worth solving. We combine the right interface, workflow and integrations around that goal.

Websites & online stores

Clear service pages, product journeys, enquiry forms and booking paths that work on phones and desktops.

Custom apps & portals

Dashboards, client workspaces and mobile-friendly tools for capture, reporting, approvals and daily operations.

AI knowledge tools

Help people find answers in approved documents, with source references and a defined review process.

Workflow automation

Connect forms, spreadsheets and business tools. Route tasks, prepare drafts and keep the right person in the loop.

Planning & AI assistance

Help shape a business idea, organise research or simplify a recurring personal task. AI outputs need checking before use.

EmberCare & ongoing support

Agree the support, maintenance and improvement work your website or system needs after launch.

Examples are starting points. Features, data access and integrations are agreed for each project.

OUR PROJECT COLLECTION

Operations & control

Tools that give everyday work a clear place to happen.

EMBERWEB PRODUCT

BioSync

One workspace for attendance, shifts and leave, giving teams a clearer view of who is working and when.

app-biosync.co.za

PRIVATE BUSINESS SYSTEM

Fuel Intelligence

A focused fleet workspace for fuel reporting, review and audit controls, keeping the process in one place.

Private project | demonstration by arrangement

PRIVATE BUSINESS SYSTEM

Asset management

A working register for equipment, custody and regional allocations, helping teams keep track of devices and their handovers.

Private project | demonstration by arrangement

PRIVATE BUSINESS TOOL

Shift planning

Build a weekly working pattern, review the shift sheet and save a printable PDF record.

Private project | demonstration by arrangement

Public summaries only. Private systems are described without client data, internal architecture or access details. This collection is a snapshot; ask about current availability.

OUR PROJECT COLLECTION

Capture & connection

From a stock report to a shared product reference.

PRIVATE BUSINESS TOOL

Stock expiry reporting

Make a stock report easier to capture: choose the store, identify the product, then add its date and quantity.

Private project | demonstration by arrangement

PRIVATE DISPLAY SYSTEM

Digital signage

Give reception and training-room screens their own display experiences, with a simple place to choose what to run.

Private project | demonstration by arrangement

PRIVATE BUSINESS PLATFORM

Digital catalogue

A shared product reference with separate sign-in paths for field teams, representatives and administrators.

Private project | demonstration by arrangement

WEB APPLICATION

FlexiForm

Give a Google Sheet a friendlier front end: build a form, map its fields to columns and collect submissions through a shared link.

flexi-form-wine.vercel.app

Public summaries only. Private systems are described without client data, internal architecture or access details. This collection is a snapshot; ask about current availability.

OUR PROJECT COLLECTION

Clients, teams & learning

Experiences that fit the people using them.

PRIVATE EMBERWEB PLATFORM

EmberWeb workspace

A shared home for client projects, invoices and requests, with separate views for clients and the team managing the work.

Private project | demonstration by arrangement

CONSUMER WEB APP

Me Body

An installable, local-first experience for food, workouts and personal progress, designed around everyday use on a phone.

me-body.vercel.app

PRIVATE COMMUNICATIONS APP

Team broadcasts

Put team updates, images and videos into a mobile-first feed, with a separate desktop experience for administrators to post.

Private project | demonstration by arrangement

CONTENT & LEARNING PLATFORM

Kingdom Index

A Christian content hub with age-group pathways, making the starting point clear for adults and supervised younger visitors.

web-three-rust-49.vercel.app

Public summaries only. Private systems are described without client data, internal architecture or access details. This collection is a snapshot; ask about current availability.

FROM IDEA TO LAUNCH

Choose a focused first build.

We can help plan an idea, improve an existing website or build software around the way your business works.

Define the need

We map the people, the current process and the result you want.

Agree the scope

We confirm deliverables, timing, price, responsibilities and any third-party services in a proposal.

Build and review

You review the agreed experience and give feedback before launch.

Launch and support

We agree the handover, access and ongoing support. Future phases can follow as priorities become clearer.

Tell us what would make your work easier.
